

standard colours for washroom systems

All colours are available in high-pressure laminate, 19mm moisture-resistant melamine-faced particleboard and 12.5mm solid laminate (compact grade).

High-pressure laminate is available in many other colours: contact us for details and availability.

Cubicles in wood-effects generally cost a little more than cubicles in other decors because the laminate is directional.

For vanity units in solid laminate (compact grade), we can offer some of these decors in 10mm postformable material: contact us for details and availability
